

Jacob McQuirk,

I cant believe what the Metropolitan Water District (MWD) is up too now.

Dams in the delta for fresher water to the Clifden For-bay. Who cares about the delta it is just a lake for the MWD to plunder and rape.

These dams that will be permanent will cause hardships to every living thing connected in the delta. Just the safety issue is enough to say NO. Lets stop the assault on our environment here.

The MWD needs to DESALINATE. The voters have voted against the Peripheral canal two times. Our delta is under attack for is resource by a for-en southern state, that refuses to desalinate and stand on its own. Desalination will deliver fresh water even in drought years.

In La Angeles they build golf courses in the desert they have no building moratorium on expanding into the desert. The mwd expects to take our water and leave our environment, wildlife and Eco system in shambles.

Jacob, I hope that you care for our environment and stop the assault. Lets Desalinate L.A.

Connie McCabe
