Jacob McQuirk, Supervising Engineer
California Department of Water Resources
P.O. Box 942836
Sacramento, CA 94236

Reference: Opposition to DWR Temporary Emergency Drought Barriers

Dear Mr. McQuirk:

I am opposed to spending millions of dollars for a project that will further destroy our already fragile Delta – a project that is called “temporary” when there is no money allocated for removal.

DWR has used flawed and incomplete information in their Negative Declaration. I am asking for a full Environmental Impact Report (EIR) and time for public workshops and meetings in each part of the Delta.

This current plan will negatively affect the following without satisfactory mitigation:

1. Wildlife habitat and endangered species
2. Farming
3. Recreation
4. Economic stability
5. Drinking water quality

These are just a few of my concerns. We will leave further objections to RBOC, DPC, Restore the Delta, California Sport Fishing Protection Alliance, California Striped Bass Association, WIN, and other organizations who will speak on our behalf.

Sincerely,

Signature

Reference: Opposition to DWR Temporary Emergency Drought Barriers

Dear Mr. McQuirk:

I am opposed to spending millions of dollars for a project that will further destroy our already fragile Delta – a project that is called “temporary” when there is no money allocated for removal.

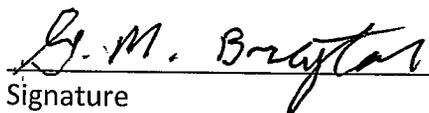

DWR has used flawed and incomplete information in their Negative Declaration. I am asking for a full Environmental Impact Report (EIR) and time for public workshops and meetings in each part of the Delta.

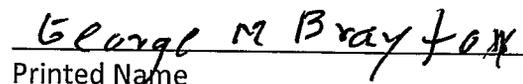

This current plan will negatively affect the following without satisfactory mitigation:

1. Wildlife habitat and endangered species
2. Farming
3. Recreation
4. Economic stability
5. Drinking water quality

These are just a few of my concerns. We will leave further objections to RBOC, DPC, Restore the Delta, California Sport Fishing Protection Alliance, California Striped Bass Association, WIN, and other organizations who will speak on our behalf.

Sincerely,

Signature

Reference: Opposition to DWR Temporary Emergency Drought Barriers

Dear Mr. McQuirk:

I am opposed to spending millions of dollars for a project that will further destroy our already fragile Delta – a project that is called “temporary” when there is no money allocated for removal.

DWR has used flawed and incomplete information in their Negative Declaration. I am asking for a full Environmental Impact Report (EIR) and time for public workshops and meetings in each part of the Delta.

This current plan will negatively affect the following without satisfactory mitigation:

1. Wildlife habitat and endangered species
2. Farming
3. Recreation
4. Economic stability
5. Drinking water quality

These are just a few of my concerns. We will leave further objections to RBOC, DPC, Restore the Delta, California Sport Fishing Protection Alliance, California Striped Bass Association, WIN, and other organizations who will speak on our behalf.

Sincerely,

Signature

I am opposed to spending millions of dollars for a project that will further destroy our already fragile Delta – a project that is called “temporary” when there is no money allocated for removal.

DWR has used flawed and incomplete information in their Negative Declaration. I am asking for a full Environmental Impact Report (EIR) and time for public workshops and meetings in each part of the Delta.

This current plan will negatively affect the following without satisfactory mitigation:

1. Wildlife habitat and endangered species
2. Farming
3. Recreation
4. Economic stability
5. Drinking water quality

These are just a few of my concerns. We will leave further objections to RBOC, DPC, Restore the Delta, California Sport Fishing Protection Alliance, California Striped Bass Association, WIN, and other organizations who will speak on our behalf.

Sincerely,

Signature

Reference: Opposition to DWR Temporary Emergency Drought Barriers

Dear Mr. McQuirk:

I am opposed to spending millions of dollars for a project that will further destroy our already fragile Delta – a project that is called “temporary” when there is no money allocated for removal.

DWR has used flawed and incomplete information in their Negative Declaration. I am asking for a full Environmental Impact Report (EIR) and time for public workshops and meetings in each part of the Delta.

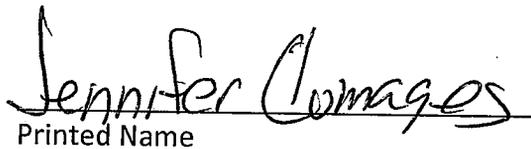

This current plan will negatively affect the following without satisfactory mitigation:

1. Wildlife habitat and endangered species
2. Farming
3. Recreation
4. Economic stability
5. Drinking water quality

These are just a few of my concerns. We will leave further objections to RBOC, DPC, Restore the Delta, California Sport Fishing Protection Alliance, California Striped Bass Association, WIN, and other organizations who will speak on our behalf.

Sincerely,

Signature
